

MUUW analog coupler component IN: +/-10 V - OUT: +/-10 V

INPUT: ±0...10 V DC OUTPUT: ±0...10 V Screw terminals

Image

- Input, output, and supply voltage galvanically separated

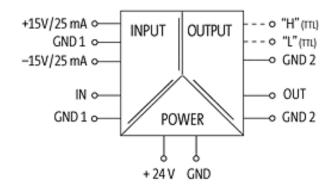

Technical Data	
Operating voltage range	24 V DC, +15/-10 %
	max. 200 mA
Operating current	
Input frequency	5 kHz, sine wave
Output load	RL <= 400 Ohm at output
Tolerance	±1%
Temperature range	0+50 ℃
Mounting method	DIN-rail mountable (EN 60715)
Dimensions H × W × D	75 x 22.5 x 102 mm
Input	
Input resistor	approx. 100 kOhm at voltage input; approx. 75 Ohm at current input
General data	
Test isolation voltage	1.5 kV
Description	
	The Murrelektronik analog converters convert the standard input signal formats (010 V, 020 mA, 420 mA) galvanically isolated into one of these signals. Due to an integrated current limiter on the output, the output is short circuit and overload protected. A special characteristic of the MULTIWANDLER Art No. 6644207 includes: Analog voltage signals 05 V/010 V and -10?+10 V and current signals 020 mA and 420 mA, these compact modules can be galvanically isolated in the three standard signals, which means all combinations are covered with one model. The selection of the input is done by means of a 5-pole rotary switch, accessible under the identification tag. The voltage supply is galvanically isolated from the input and output circuits (3-way isolation). Isolation prevents interference on the input from appearing at the output. Art Nos. 44202 and 44203 have 2 electrically isolated ±15 V DC/25mA supplies available. The terminals ?H? (+) and ?L? (?) shown on the diagram are only on Art. No. 44202 and give the input signals.
