## VARIO enclosed switch disconnectors, pre-assembled

2

VCF 0GE

### Enclosed switch disconnectors for high performance applications

- 3-pole rotary switch disconnectors, 10 to 140 A, conforming to IEC 60947-4-1 and IEC 60204.
- Marking on operator
- Padlockable operating handle (padlocks not included).
- IP 65 degree of protection enclosures, sealable and lockable.
- Cover lockable in position "I" (ON) up to 63 A rating.

#### 3-pole main and Emergency Stop switch disconnectors (1)

## Characteristics (1)

Conforming to standards	IEC 60947-4, IEC 60439-1, VDE 0660-102 and EN 60947
Degree of protection conforming to IEC 60529	GV2 LC: IP 547 GV NGC: IP 407
Operational voltage Ue	GV2 LC: 690 V GV NGC: 500 V
Material	Polycarbonate (2)

## Variants

### Starters with control by red rotary handle on yellow background

Add the letter **R** to the references selected above.  
Example: GV2 LC0206 becomes GV2 LC0206R.

### Enclosure without circuit-breaker, with rotary handle mounted on cover

Description	Rating	Reference	Weight
	A		kg
Black rotary handle	1.6...18	GV2 LC02	0.300
	25...63	GV NGC02	0.550
Red rotary handle on yellow background	1.6...18	GV2 LC02R	0.300
	25...63	GV NGC02R	0.550

GV2 LC02

(1) Circuit-breaker characteristics:

GV2 L: see pages 3/14 and 3/15.

NG 125L: product marketed under the Schneider Electric brand, please consult your Regional Sales Office.

(2) Avoid placing this material in contact with harsh substances (detergents, chlorine solvents, ketones, alcohol, aromatic hydrocarbons).

(3) The following can be fitted by the customer: a GVAD or GVAM auxiliary contact block on the LH side and a GVA trip on the RH side.

# TeSys enclosed starters

D.O.L. starters for motor control  
0.25 to 7.5 kW with 3-phase thermal  
overload relay with 3 protected phases

## Characteristics (1)

Conforming to standards	IEC 60947-4-1, IEC 60439-1, VDE 0660-102 and EN 60947
Degree of protection conforming to IEC 60529	IP 65
Ambient air temperature	Operation: - 5 to + 40 °C
Operating positions	Same as for the TeSys K contactors
Material	Self-extinguishing ABS

## References

### Non-reversing starters

Starter LE1 M, combined with short-circuit protection components, provides type 1 or type 2 coordination, depending on the type of devices used.

LE1 M35●●●●

## Description

■ The standard version comprises:

- 1 TeSys contactor LC1 K●●,
- 1 TeSys thermal overload relay LR2 K,
- 1 green Start button "I",
- 1 red Stop/Reset button "O/R",
- 1 yellow operating indicator.

■ Control may be pulsed or maintained.

■ An earth terminal and a neutral terminal are provided on the bottom of the enclosure.

■ For safety applications, see enclosed starters:

GV2 MC, LG1 K, LG1 D, LG7 K, LG7 D, LJ7 K, LG8 K and LJ8 K.

## Variant

### Starter without thermal overload relay LR2 K

Delete the last 2 digits of the starter references selected above.

Example: LE1 M35●●

## Replacement part

Description	Basic reference, to be completed by adding the voltage code (3)	Weight
		kg
Contacteur	LC1 K●●A80	0.180

(1) For characteristics of TeSys K contactor, see pages 5/10 to 5/13.

For characteristics of TeSys thermal overload relay LR2 K, see pages 6/10 and 6/11.

(2) Thermal overload relay fitted as standard.

(3) The contactor coil is pre-wired between 2 phases of the power circuit.

The codes indicated below therefore correspond to the **power circuit voltage**.

Volts ~ 50/60 Hz	24	220	230	240	380	400	415	440
Code	B7	M7	P7	U7	Q7	V7	N7	R7

Example: 380/400 V 3-phase supply, 4 kW motor: LE1 M35Q716.

## TeSys enclosed starters

Star-delta starters (1)

90 to 375 kW, without isolating device

2

553686

553687

LE3 F●●●●●

## Star-delta starters

Maximum operating rate: 12 starts/hour.

Maximum starting time: 20 seconds

Standard power ratings of squirrel cage motors Mains voltage - delta connection				Basic reference, to be completed by adding the voltage code (2) (3)	Weight
220 V	380 V	415 V	440 V		
kW	kW	kW	kW		kg
90	160	160	185	LE3 F185●●	31.400
100	200	200	220	LE3 F225●●	33.000
110	220	220	250	LE3 F265●●	50.800
160	280	280	315	LE3 F330●●	80.000
185	315	355	375	LE3 F400●●	82.000

## Specifications

Enclosure	LE3 F185...F400	Metal, degree of protection IP 559
No pushbuttons on cover	LE3 F185...F400	-
Connections	LE3 F185...F400	Pre-wired power and control circuit connections

## Variants (pre-assembled)

Description	For use on	Suffix to be added to the starter reference(4)
1 green Start button "I"	LE3 F185...F400	A06
1 red Stop/Reset button "O"		

(1) Overload protection must be provided by a thermal overload relay, to be ordered separately. Select appropriate overload relay for setting at 0.58 of the full load rated motor current, see pages 6/34 and 6/35.

(2) Standard control circuit voltages.

Volts	48	110	220/230	230	240	380/400	400	415
50/60 Hz	E7	F7	M7	P7	U7	Q7	V7	N7

For other voltages, see pages 5/130 to 5/139.

(3) LC1 F185 and F225: contactors fitted with LX9 F coils,

LC1 F265...F400: contactors fitted with LX1 F coils.

(4) Example: LE3 F185M7A06.

Magnetic protection conforming to IEC 60947-1/2/4/6-2	Instantaneous trip current setting range	I <sub>rth</sub> max.	Fixed at 15	6...12 (2)	6...12	3...6
	Tripping tolerance		± 20 %			

Characteristics of versions with control test function and padlocking facility		
Conforming to standards		IEC 60947, NF C 63-130, VDE 0660, VDE 0113
Rated operational voltage	V	690
Mechanical durability	Operating cycles	10 000
Padlocking		1, 2 or 3 padlocks (shank Ø 8 mm max. and Ø 5 mm min.). When flush mounting, interlocking of the enclosure or cabinet door is possible.

(1) Above this value, the breaker trips.  
 (2) Usual setting range 9...10 I<sub>rth</sub> max.

### Specifications

Functions performed by the starter:

- isolation,
  - locking of isolation fitted as standard as from LG7 K09,
  - lockable Emergency Stop (1/4 turn) <sup>(3)</sup>,
  - short-circuit protection,
  - overload protection,
  - pushbutton control: 1 white Start button "I" and 1 black Stop button "O",
  - degree of protection of enclosure: IP 657, double insulated.
- Switching back on of power supply after tripping must be by a deliberate action.

A GV2 SN●● indicator light may be added (to be assembled by customer), please consult your Regional Sales Office.

For supply voltages between 380 and 415 V (codes Q7, V7 or N7) the control circuit is pre-wired between phases. For other supply voltages, the control circuit must be wired by the customer.

### Variants (pre-assembled)

See page 2/65.

<sup>(1)</sup> Compliance with a harmonised European standard assumes conformity with the corresponding directive, provided that installation, building in and/or assembly of the starter is carried out correctly by the machine manufacturer.

Harmonised European standards: EN 60947 and EN 60439.

Conformity to international standards: IEC 60947 and IEC 60439.

<sup>(2)</sup> Standard control circuit voltages (for other voltages, please consult your Regional Sales Office):

### Non-reversing starters with integral transformer

Compliance with a harmonised European standard assumes conformity with the corresponding directive, provided that installation, building in and/or assembly of the starter is carried out correctly by the machine manufacturer.

Harmonised European standards: EN 60947 and EN 60439.

Conformity to international standards: IEC 60947 and IEC 60439.

#### Starters pre-wired for operation on a 3-phase 380 to 400 V 50 Hz supply (with pushbutton control of isolator function)

Standard power ratings of 3-phase motors 50 Hz in category AC-3	Circuit-breaker	Dust and damp protected starter	Weight
380/400 V	Setting range of thermal trips	Reference (1)	
kW	A		kg
0.06	0.16...0.25	LJ7 K06Q702	2.270
0.09	0.25...0.40	LJ7 K06Q703	2.270
0.18	0.40...0.63	LJ7 K06Q704	2.270
0.25	0.63...1	LJ7 K06Q705	2.270
0.55	1...1.6	LJ7 K06Q706	2.270
0.75	1.6...2.5	LJ7 K06Q707	2.270
1.5	2.5...4	LJ7 K06Q708	2.270
2.2	4...6.3	LJ7 K06Q710	2.270
4	6...10	LJ7 K09Q714	2.270

#### Specifications

Functions performed by the starter:

- isolation,
- locking of isolation fitted as standard on LJ7 K09,
- lockable Emergency Stop (1/4 turn) (2),
- short-circuit protection,
- overload protection,
- pushbutton control: 1 white Start button "I" and 1 black Stop button "O",
- terminal allowing connection of a volt-free contact, if required, in the control circuit,
- degree of protection of enclosure: IP 657, double insulated.

Switching back on of power supply after tripping must be by a deliberate action.

AGV2 SN●● indicator light may be added (to be assembled by customer), please consult your Regional Sales Office.

Integral transformer: 400/24 V, 25 VA.

#### Variants (3)

Description	For use on	Suffix to be added to the starter reference (4)
With Emergency Stop No control pushbuttons	LJ7	A04
Without Emergency Stop (when the Emergency Stop is on the machine)	LJ7	A39
With padlocking facility (fitted as standard on LJ7 K09)	LJ7 K06	A29
Without circuit-breaker	LJ7	(5)

(1) In the reference, the voltage code **Q7 (380/400 V)** indicates the power supply voltage to which the starter will be connected, it being assumed that the contactor has a ~ 24 V coil (see control circuit scheme).

(2) **LJ7 K06** ( $P \leq 3$  kW at 400 V): the mushroom head type Emergency Stop acts mechanically on the circuit-breaker.

**LJ7 K09** ( $P > 3$  kW at 400 V): the Emergency Stop function is performed by an undervoltage trip **GV AX385**, acting on the circuit-breaker. This circuit-breaker is always supplied pre-wired for use on 380/400 V 50 Hz.

(3) Possible combination of variants A04, A29 and A39 on starters LJ7 K06. Example: **LJ7 K06Q702A04A29A39**.

Possible combination of variants A04 and A39 on starters **LJ7 K09Q714A04A39**.

(4) Example: **LJ7 K06Q702A04**.

(5) Delete the last 2 digits of the selected starter reference. Example: **LJ7 K06Q702** becomes **LJ7 K06Q7**.

#### Other versions

Starters for voltages other than those indicated above.  
Please consult your Regional Sales Office.

### Presentation

Decentralised control of motors using enclosed starters which communicate on AS-Interface, drastically reduces setting-up times, thereby increasing the availability of machines.

In order to cater for different environments, these starters are sub-divided according to:

- the different power connection methods: cable gland or Harting plug-in connectors,
- the local/AS-Interface remote operating modes,
- the type of enclosure: insulated (plastic) or metal.

### Decentralisation of machine starters

These enclosed starters which communicate on AS-Interface are pre-assembled and ready-to-use with a minimum of cabling.

They are designed for building decentralised electrical installations:

i.e. the starters are installed as near as possible to the motors they are to control. The decentralisation of the starters provides obvious advantages regarding power distribution to machines not grouped together, for example: motors driving a conveyor system.

### Traditional installation

- Distribution circuit circuit-breaker
- Programmable controller with its inputs/outputs
- Contactor + thermal overload relay

### Decentralised installation

- Distribution circuit circuit-breaker
- Programmable controller
- AS-Interface starters

Power is distributed either by prefabricated trunking or by cable.

These starters incorporate all the functions necessary for the management of motors (control, protection, isolation, etc.), and comprise:

- a thermal-magnetic circuit-breaker,
- a low consumption contactor (non reversing) or contactor pair (reversing),
- an I/O module ASI 20MT●●.

Designed primarily for use with 3-phase a.c. motors, they can nevertheless be used with single-phase or d.c. motors. In these applications, the 3 phases of the internal circuit-breaker should be wired in series (each phase sensing the same current) in order to avoid tripping due to an assumed phase failure.

### Connection by cable gland

- 1 Product diagnostics via 3 LEDs.
- 2 Input state.
- 3 Output state.
- 4 Knock-out for cable gland (not included for any power extension or output control relay cabling).
- 5 Disconnect rotary control knob.  
Indicates "Trip" when switch-disconnector tripped.
- 6 Local/AS-Interface key switch (variant A79).
- 7 For variant A79: 3-position, spring return to zero selector switch for reversing starter (LF4). Function:  
- position 1 = forward running,  
- position 0 = Stop,  
- position 2 = reverse running.  
Pushbutton for non-reversing starter (LF3).  
Function: Pulsed operation.
- 8 Cable gland for power supply cable.
- 9 M12 female connector for cable connection to a sensor (supplied with protective cap).
- 10 M12 male connector for connection to AS-Interface (1) and auxiliary supply.
- 11 Cable gland for motor cabling.
- 12 Reset pushbutton.
- 13 Stop pushbutton.

### Connection by plug-in connectors (variant A74)

- 1 Product diagnostics via 3 LEDs.
- 2 Input state.
- 3 Output state.
- 4 Knock-out for cable gland (not included for output control relay cabling).
- 5 Male connector for incoming power supply to motor starter (2).
- 6 Disconnect rotary control knob.  
Indicates "Trip" when switch-disconnector tripped.
- 7 Female connector for power supply to the next motor starter (2).
- 8 Local/AS-Interface key switch.
- 9 For variant A79: 3-position, spring return to zero selector switch for reversing starter (LF4). Function:  
- position 1 = forward running,  
- position 0 = Stop,  
- position 2 = reverse running.  
Pushbutton: for non-reversing starters (LF3).  
Function: Pulsed operation.
- 10 Female connector for power supply to motor (2).
- 11 M12 female connector for cable connection to a sensor (supplied with protective cap).
- 12 M12 male connector for connection to AS-Interface (1) and auxiliary supply.
- 13 Stop pushbutton.
- 14 Reset pushbutton.

(1) Extension cables: please consult your Regional Sales Office.

(2) HARTING plug-in connector to be fitted to cable (not included, see page 2/95).

### Auxiliary supply

A ~ 24 V supply is necessary for LF3 and LF4 starters.

Prospective current consumptions are listed on page 2/83.

### Motor command-control

The functions provided by this range of starters are:

- motor control and status monitoring via AS-Interface,
- D.O.L. starting (non-reversing or reversing),
- overload protection of the motor,
- short-circuit protection of the motor and its power supply cabling.

### Starters with rotary control knob

These starters provide the following functions:

- load break switch-disconnector with padlockable control knob,
- IP 54 degree of protection, double insulation.

Opening of the enclosure is mechanically inhibited whilst the starter is switched on or whilst in the off position and padlocked.

The rotary control knob has 3 positions:  
 0: switch-disconnector opened manually,  
 I: switch-disconnector closed,  
 Trip: switch-disconnector tripped.

### Starters with pushbutton control

These starters provide the following functions:

- pushbutton resetting of the protection device,
- pushbutton stop control,
- IP 54 degree of protection, double insulation.

### Local control

Stop and reset functions are possible from the front of the enclosure. The stop command is achieved by actuating the internal circuit-breaker, which provides the switch-disconnector function.

Depending on the type of starter, stopping is controlled by either:

- a rotary control knob, or
- a stop pushbutton (black).

In the event of an overload, resetting of the internal thermal-magnetic circuit-breaker is possible after the motor has cooled down.

Depending on the type of starter, resetting is controlled by either:

- a rotary control knob, or
- a reset pushbutton (blue).

### Integral local/AS-Interface control (variant A79)

This starter variant is fitted with a 2-position "local/AS-Interface" switch which, depending on the position of the switch, allows the following functions:

- AS-Interface: the PLC controls the motor starter.
- Local: local Start/Stop commands override instructions from the PLC.
- 3-position, spring return to zero selector switch for reversing starter (LF4).  
Function:
  - position 1 = forward running,
  - position 0 = Stop,
  - position 2 = reverse running.
- Pushbutton for non-reversing starter (LF3) .  
Function:
  - Pulsed operation.

### Control via a control station

It is possible to achieve manual local start control from pushbutton control stations connected to AS-Interface. Please consult your Regional Sales Office.

Actuation of a pushbutton is transmitted to the programmable controller (message 1) which passes it on to the starter (message 2).

### Local signalling

Indication of all the operating states (diagnostic, inputs and outputs) is visible without having to open the enclosure (transparent window in the enclosure cover).

### Safety

The starter features continual self-checking to ensure correct operation.

External safety functions are not processed by the starter.

Emergency stop and machine safety wiring must follow standard safety practice and be hard-wired, using electromechanical devices in the approved way. These functions must not be handled by communication bus systems (EN 60204 § 9.2.5.4).

Protection against unexpected restarting, after an accidental power supply failure, must be provided by a safety device separate from the starter.

The starter control (rotary knob or pushbutton) does not provide the Emergency Stop function if the machine is fitted with other actuators. The control operators on the starter are therefore coloured black, in accordance with standard EN 60204 § 10.2.1. Starters with rotary control knob may be padlocked in the ON position, since this control does not provide an Emergency Stop function.

### Assume fallback condition

When communication is interrupted, the starter is no longer controlled by the PLC. The fallback condition of the starter is "motor stopped" (outputs at 0).

### Output control relay

This relay incorporates a C/O contact, which may be used to control an indicator lamp, solenoid valve, etc. (250 V, 5 A), via AS-Interface.

### Starters with sensors connected (1)

Two 3-wire PNP sensors (50 mA max) or 2-wire limit switches can be connected directly to the starter.

The information supplied by the sensor/limit switch is fed back via the AS-Interface line.

(1) For "Reflex Stop" function, please consult your Regional Sales Office.

## Starters in metal enclosures

- To order a metal enclosure, add a letter **M** after LF3 or LF4, in the references selected above.  
Example: LF3 P02D becomes **LF3 MP02D**.
- To order a metal enclosure that conforms to standards UL 508 and CSA C22-2 n° 14, add a letter **M** after LF3 or LF4 and a letter **U** at the end of the references selected above. Example: LF3 P02D becomes **LF3 MP02DU**.

## Variants (pre-assembled)

LF4 MP●●DA7A79

Description	For mounting on	Suffix to be added to the starter reference (5)
With HARTING connectors (6)	Insulated or metal enclosure	<b>A74</b>
With local/AS-Interface control	Insulated enclosure	<b>A79</b>
With local/AS-Interface control	Metal enclosure	<b>A79</b>

- (1) Only for metal enclosures with letter **U** at the end of the reference. Certification pending.  
 (2) Avoid allowing the material to come into contact with strong bases (detergents, chlorine solvents, ketones, alcohol, aromatic hydrocarbons).  
 (3) On metal enclosures only, to order an Emergency Stop rotary control knob with red handle on yellow background, add the letter **R** to the end of the reference. Example: **LF3 MP02DR**.  
 (4) Supplied without GV2 P motor circuit-breaker.  
 (5) Example: **LF3 P02DA7A74**.  
 (6) Connectors to be fitted to cables (to be ordered separately, see page 2/95).

### Insulated enclosures LF3 and LF4

Power extension (daisy-chaining)

Terminal

### Metal enclosures LF3 and LF4

### Accessories for insulated enclosures with variant A74

#### Presentation

In order to reduce setting-up times and to simplify maintenance, variant A74 LF starters are fitted with Harting plug-in connectors. These starters are designed to allow 2 types of connection topology.

#### Connection using tap links

This configuration avoids having to switch off the power supply when replacing or adding one or more starters. Although machine availability is increased, a larger number of power connections is required: 4 per starter.

#### Connection using power extension (daisy-chaining)

The number of power connections per starter is halved, but continuity of service is no longer assured if any of the "upstream" starters are disconnected or removed. With this type of installation, special precautions must be taken because removal of a starter at the head of the power supply line de-energises all the remaining starters on that line. For safety reasons therefore, starters must not be removed under load (prohibited by standard EN60204 above 3kW/400V).

The 2 connection kits and accessories shown below have been designed to facilitate setting up of power extension configurations by the user.

#### Connection kit (depending on enclosure application)

Enclosure application	Capacity	Kit contents	For mounting on	Reference	Weight
	mm <sup>2</sup>				kg
Power extension (daisy-chaining)	3-pole 1.5 or 2.5	1 female connector 2 male connectors and corresponding power sockets (1)	Enclosures LF3 and LF4	LA9 LFC	0.150
Terminal	3-pole 1.5 or 2.5	1 female connector 1 male connector 1 blanking plug and corresponding power sockets (1)	Enclosures LF3 and LF4	LA9 LFT	0.110

#### Crimping contacts

Type	Capacity	Sold in lots of	Unit reference	Weight
	mm <sup>2</sup>			kg
Male	1.5	100	LA9 LFM15	0.120
	2.5	100	LA9 LFM25	0.120
Female	1.5	100	LA9 LFF15	0.160
	2.5	100	LA9 LFF25	0.150

### Accessories for metal enclosures with variant A74

#### Connection kits

For connector	Kit contents	For mounting on	Reference	Weight

### Presentation

AS-Interface modules **LA9 Z32810** and **LA9 Z32811** allow motor starters to be monitored and controlled by AS-Interface. These products are in addition to the "AS-Interface enclosed starter" range, LF1 and LF2.

The module sizes offered are: 2 inputs/1 output or 4 inputs/2 outputs.

These products can be mounted in two ways:

- on  rail,
- on **LA9 Z●●●** adapters for use with busbar systems.

Inputs/outputs are connected to a built-in, flexible terminal type connector, so reducing installation time.

The AS-Interface line is connected to the module by the yellow connector. The external  $\bar{\text{M}}$  24 V supply to the module outputs is connected to the black connector. With this supply method, it is possible to make the output states subject to external safety conditions (Emergency stop, safety overtravel, etc.).

### Fields of application

The various module sizes allow control of:

- non-reversing starters,
- reversing starters,
- 2-speed starters for motors with separate windings.

The outputs, supplied by the separate auxiliary voltage, can simultaneously switch a current of 0.5 A at  $\sim$  24 V and can therefore switch the following contactors:

- LP1, LP4 K06 to K12,
- LC1 D09 to D32.

### Composition

#### AS-Interface module

- 1 AS-Interface green/red LED indicator:
  - red: no communication with the Master. The outputs are switched off,
  - green: communication OK, outputs OK,
  - red/yellow flashing: module has no address (assign an address between 1 and 31),
  - off: no power supply to AS-Interface.
- 2 Green PWR LED:
  - LED on: auxiliary power supply ON,
  - LED off: auxiliary power supply OFF.

Flame resistance	Conforming to IEC 60695-2-1	°C	960				
Resistance to external mechanical impact	1/2 sine wave, 11ms conforming to IEC 60068-2-6			15 gn			
Vibration resistance	5...150 Hz conforming to 60068-2-6			2 gn			
Immunity to non-dissipating shockwave (Uimp)	Conforming to IEC 60439-1	kV	2.5: AS-Interface, 24 V and on inputs/outputs				
Immunity to electrostatic discharge	Conforming to IEC 61000-4-2 EN 61000-4-2	kV	8: in open air (level 3) 4: in indirect mode (level 2)				
	Conforming to IEC 61000-4-4 EN 61000-4-4 level 4	kV	2: AS-Interface, 24 V and on inputs/outputs				
Immunity to fast transient currents	Conforming to IEC 61000-4-5 EN 61000-4-5	kV	2: AS-Interface, 24 V and on inputs/outputs				
Immunity to dissipated shock wave	Conforming to IEC 61000-4-6 ENV 50 141	V/m	10				
Immunity to conducted radio-frequency interference	Conforming to IEC 61000-4-3 ENV 50 140 and ENV 50 204 (GSM)	V/m	10				
Radio-conducted and radio-radiated rejection	ENV 55 011/CISPR (G1)			Class A			
AS-Interface supply		V	29.5-31.6				
Cabling c.s.a., AS-Interface	Flexible cable	mm <sup>2</sup>	2 x 0.5...0.75				
Cabling c.s.a., 24 V	Flexible cable	mm <sup>2</sup>	2 x 0.5...0.75				
Cabling c.s.a., input/output	Flexible cage terminal and flexible cable	mm <sup>2</sup>	0.08...2.5; AWG28...12				
Input current		mA	7				
Coincidence of inputs				100 %			
Maximum length of wires to switching components		m	0.4				
Maximum current of outputs	--- 13/14, (24 V)	A	0.5				
Thermal current	I <sub>th</sub>	A	2				
Coincidence of outputs				100 %			
Short-circuit protection	By flywheel diode			Yes			
Outputs switched off in event of interference on the AS-Interface line	Watchdog			Yes			
AS-Interface profile				3 F		7 F	
Number of I/O				2 inputs/1 output		4 inputs/2 outputs	
Current consumption	On AS-Interface On/OFF	mA	8...12		8...12		
Data bits	Command	Status	0	1	0	1	
		D0 (O)	Out 1	Off	On	Off	On
		D1 (O)	Out 2	Not used		Off	On
		D2 (O)	Out 3	Not used			
	Status	D3 (O)	Out 4	Not used			
		D0 (I)	In 1	Absent	Present	Absent	Present
		D1 (I)	In 2	Absent	Present	Absent	Present
		D2 (I)	In 3	Not used		Absent	Present
		D3 (I)	In 4	Not used		Absent	Present
		P0...P3			Not used		

### AS-Interface modules (1) (2)

No. of channels	Number of inputs	Number of outputs	Output voltage	Current per output	Reference	Weight kg
			V	A		
3	2	1	~ 24	0.5	LA9 Z32810	0.070
6	4	2	~ 24	0.5	LA9 Z32811	0.070

### Accessories

Description	Busbar system	Width	Reference	Weight kg
	mm	mm		
Modules without electrical connection, for use with all LA9 Z●● adapters	40 or 60	45	LA9 Z32744	0.044
		54	LA9 Z32745	0.051
Module with PE + N polarity and 5-way connector	40	45	LA9 Z32740	0.091
		54	LA9 Z32741	0.098
	60	45	LA9 Z32742	0.085
		54	LA9 Z32743	0.092

### Replacement connectors and adapter cable

Description	Colour	Sold in lots of	Unit reference	Weight kg
Insulation Displacement Connector (IDC) for AS-Interface	Yellow	5	LA9 Z32825	0.100
Insulation Displacement Connector (IDC) for auxiliary supply	Black	5	LA9 Z32826	0.100

Description	Cable length	Reference	Weight kg
Adapter cable for connection to addressing terminal XZ MC11	0.5	XZ MG12	0.070

(1) User's Manual to be ordered separately, please consult your Regional Sales Office.

(2) Supplied with connectors LA9 Z32825 and LA9 Z32826.

2

**Dimensions**

LA9 Z3281●

**Mounting on modules**

LA9 Z32742, LA9 Z32743

60 mm busbar system

LA9 Z32740, LA9 Z32741

40 mm busbar system

Common front face view

LA9	a
Z32740, Z32742	45
Z32741, Z32743	54

LA9 Z32745

40 or 60 mm busbar system

LA9 Z32744

Common front face view

LA9	a
Z32745	54
Z32744	45
