Precautions

CAUTION

RECOMMENDED SOLDERING CONDITION

For manual soldering. Please use lead-free soldering and the soldering shall be implemented using a soldering bit at a temperature lower than 350C, and shall be finished within 3.5 seconds for one land. No external force shall be applied to resin part while soldering is implemented. Next process of soldering should be carried out after the product has return to ambient temperature.

CAUTION: TEMPERATURE CONTROL

Suggested Temperature on Tc	Suggested Temperature on the center of Emitting diameter:
$T_c = T_{J-c} - (R_{j-c} * P_i)$ $T_{J-c} \leq 125^\circ\text{C}$	Warm White LED <130°C Natural White LED <115°C Cool White LED <110°C

CAUTION: RISK OF STATIC ELECTRICITY

Handling of TYF LED array needs countermeasures against static electricity because this is a semiconductor product. Please take adequate measures to prevent any static electricity being produced such as the wearing of a wristband or anti-static gloves when handling this product. Every manufacturing facility in regard to the product (plant, equipment, machine, carrier machine and conveyance unit) should be connected to ground and please avoid the product to be electric-charged. ESD sensitivity of this product is 2000V (HBM, based on JEITA ED-4701/304). After assembling the LEDs into your final product(s), it is recommended to check whether the assembled LEDs are damaged by static electricity (electrical leak phenomenon) or not.

CAUTION: CHEMICAL EXPOSURE HAZARD

Exposure to some chemicals commonly used in luminaire manufacturing and assembly can cause damage to the LED array. Please consult TYF Installation Instruction for additional information.

CONTACT WITH LIGHT EMITTING SURFACE (LES)

Avoid any contact with the LES. Do not touch the LES of the LED array or apply stress to the LES(yellow phosphor resin area). Contact may cause damage to the LED array. Optics and reflectors must not be mounted in contact with the LES (yellow phosphor resin area). Optical devices may be mounted on the top surface of the plastic housing of the TYF LED array. Use the mechanical features of the LED array housing, edges and/or mounting holes to locate and secure optical devices as needed.

EYE SAFETY

Eye safety classification for the use of TYF LED arrays is in accordance with specification IEC/TR 62778: Application of IEC 62471 for the assessment of blue light hazard to light sources and luminaires. We classify TYF LED at 4000K qualified RG2 , Ethr= 1847.5 lx. At 5000K qualified RG2. Ethr= 1315.8 lx. At 6500K qualified RG2, Ethr= 1124.5 lx.

Please consult TYF Installation Instruction for additional information.
