

TOROIDAL OUTPUT TRANSFORMER Type TTG-EL84SE Single Ended

TTG-EL84SE Single Ended Output Transformer

Toroidal Single Ended output transformer with UL tap, for tubes 2xEL84, 2x6V6 ($2x6\Pi6C$), 2x6BQ5, 6P14P ($2x6\Pi14\Pi$) introduces benefits of toroidal cores to tube output. Through the use of innovative, internationally patented winding technology, we have achieved exceptional electrical parameters, such as flat frequency bandwidth in acoustic range, very low THD distortion and high quality factor.

Transformer is also available in stainless steel box potted EXPO version.

Technical Data:

Nominal power: 30W Nominal anode current: 150mA Frequency bandwidth (-3dB): 10Hz - 55kHz Secondary inductance: 4 i 8 Ω

Primary Impedance: 4.18Ω

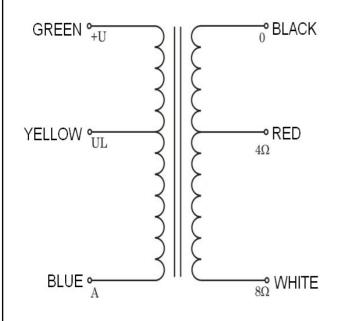

Turns Ratio (Np:Ns): $35,36:1 (4\Omega)$, $25,00:1 (8\Omega)$

Primary Inductance Lp: 27,5H Primary Leakage Inductance Lsp: 1,91mH Total Primary DC Resistance: 95 Ω

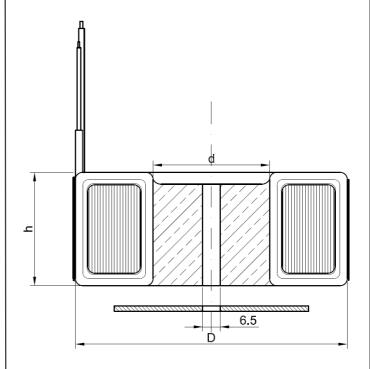

Core type: Toroidal

Intended for: Single Ended, 43% UL

Wiring diagram:

DIMENSIONS:

Outer diameter (D): 115mm
Inner diameter (d): 40mm
Height (h): 65mm
Weight: 2,2 kg
Leeds length: 250mm
