

CE IP67

## ■ Features

- Series connection style
- Line to Ground & Line to Line protected
- 10kA maximum discharge current( $I_{max}$ ), 8/20 $\mu$ s
- Thermally protected
- Double insulation cable wire
- LED status indicator
- IP67 design for indoor or outdoor installations
- Suitable for LED driver surge protection with class I insulation
- 10KV surge protection capability

## ■ Applications

- Outdoor and commercial LED Lighting
- Roadway lighting
- Traffic lighting
- Digital signage
- Wall wash lighting
- Parking garage/lot lighting
- Flood lighting
- Tunnel lighting
- Street lighting

## ■ Description

The SPD-10-320S LED Power Supply SPD is mainly composed of MOV, GDT and flame-retardant shell. It has protective functions of surge, overflowing, thermal(thermal fusing)and flame retardant, used for the power supply protection of LED road lamp.

## ■ Model Encoding

**SPD - 10 - 320S**

## SPECIFICATION

<b>MODEL</b>	<b>SPD-10-320S</b>
<b>OPERATING VOLTAGE</b>	120 ~ 320VAC 50/60Hz
<b>MCOV/U<sub>c</sub></b> (MAX. CONTINUOUS OPERATING VOLTAGE) <small>Note.1</small>	320VAC
<b>CONTINUOUS CURRENT (max.)</b>	5A
<b>U<sub>p</sub></b> (VOLTAGE PROTECTION LEVEL) <small>Note.2</small>	L-N: 1200V L-G/PE: 1500V N-G/PE: 1500V
<b>I<sub>n</sub></b> (NOMINAL DISCHARGE CURRENT) <small>Note.3</small>	5kA, 8/20μs
<b>I<sub>max</sub></b> (MAX. DISCHARGE CURRENT) <small>Note.4</small>	10kA, 8/20μs
<b>OPERATING TEMPERATURE</b>	-40 ~ +70°C
<b>SAFETY STANDARDS</b>	Compliance to IEC61643-11: 2011, IEC61000-4-5: 2005
<b>DIMENSION</b>	85*37*40 (L*W*H)
<b>PACKING</b>	0.16Kg/Unit ; 10Kg/carton(60pcs)

**NOTE:** 1. MCOV/U<sub>c</sub>: Maximum Continuous Operating Voltage - maximum r.m.s. voltage that could be continuously applied to the SPD.  
 2. U<sub>p</sub>: IEC 61643-11 Voltage protection level; the highest value of residual voltage measurements during the application of impulses of 8/20μs nominal discharge current(I<sub>n</sub>); a rounding voltage value of maximum measurement.  
 3. Nominal Discharge Current I<sub>n</sub> (A): The nominal discharge current is a measure of the SPDs endurance capability; 15 impulses of discharge current uses the 8/20μs current waveform.  
 4. Maximum Discharge Current I<sub>max</sub> (A): The maximum discharge current is a measure of the SPDs maximum capability; single impulse of discharge current uses the 8/20μs current waveform. All Devices pass maximum discharge current with possible, safe opening of thermal disconnect.

## ■ Installation Diagram

### Series Connection

Notes:

1. Green LED light ON: SPD is good
2. Green LED light OFF: SPD needs replacement

**■ Mechanical Specification**

Unit:mm

**■ INSTALLATION**

1. This document provides detailed information on how to install and operate the SPD-10-320S. Please refer to "Installation Diagram".
2. The SPD-10-320S of Surge Protective Devices are installed/connected in series with the line of TN System.
3. Before starting any installation procedures, verify service voltage(AC or DC)with a voltmeter to ensure that the correct model has been selected for the supply voltage.
4. DO NOT INSTALL THE SPD IF MEASURED VOLTAGE EXCEEDS UNIT RATINGS.
5. REMOVE POWER FROM ELECTRICAL SYSTEM PRIOR TO INSTALLATION.
6. ENSURE THAT ALL CONNECTIONS ARE CORRECT BEFORE ENERGIZING.
7. Apply power(energize),LED indicator should illuminate. If LED is out, the SPD needs replacement.
