Appearance & Shape

Features

BLM18H series has a modified internal electrode structure, that minimizes stray capacitance and increases the effective frequency range.

Features

1. BLM18H series realizes high impedance at 1GHz and is suitable for noise suppression from 500MHz to GHz range. The impedance value of HG/HD-type is about three times as large as that of A/B-type at 1GHz though the impedance characteristic of HG/HD-type is similar to A/B-type at 100MHz or less.
2. HG-type is effective in noise suppression in wide frequency range (several MHz to several GHz). HD-type for high-speed signal line provides a sharper roll-off after the cut off frequency.
3. The magnetic shielded structure minimizes cross talk.
